Software Engineer specializing in full-stack development and AI-driven solutions, with experience building scalable web applications, REST APIs, real-time systems, and intelligent software products. Proficient in React.js, Next.js, Node.js, Python, SQL, and modern development practices, with a focus on performance optimization, clean code, and delivering impactful technology solutions.

EDUCATION

Bachelor of Science, Software Engineering,
University of Engineering and Technology, Taxila
CGPA 3.84/4.0

09/2022 – 07/2026

WORK EXPERIENCE

MERN Fellow, Buildable 09/2025 – 11/2025 | Remote

- Executed JWT-based authentication and authorization, enabling secure user signup, login and protected routes.
- Integrated Stripe payment gateway, enabling 100% secure payment processing and transaction verification, while utilizing React Context API to streamline state management and reduce redundant prop passing across components.

Web developer, Bitech 07/2025 – 09/2025 | Bahria Phase 7, Rawalpindi

- Programmed and maintained web applications using HTML, CSS, JavaScript, React, Node.js, Express and MongoDB.
- Designed and implemented RESTful APIs to integrate with backend services.

MERN Intern, Innovaronix 10/2024 – 01/2025 | Remote

- Enhanced UI performance by 40% by optimizing page load speed and implementing dynamic content rendering with React.
- Utilized React to build dynamic and responsive web applications, while integrating Tailwind CSS to create visually appealing, customizable, and consistent user interfaces while enabling faster development cycles.

React and Next.js Fellow, Bytewise Limited 06/2024 – 09/2024 | Remote

- Build 5+ React.js and Next.js projects, strengthening expertise in component-based architecture, React Hooks, API integration, routing, and responsive design while improving code reusability through modular components.
- Configured server-side rendering (SSR) and static site generation (SSG) with Next.js. This optimized website speed by 40%.

SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, Next.js (SSR/SSG), Redux, Bootstrap, Tailwind CSS, Responsive Web Design

Backend: Node.js, Express.js, RESTful API Design, JWT Authentication & Authorization, Socket.io / WebSocket, Stripe Payment Integration

Databases: MongoDB, SQL

Tools & Practices: Git, GitHub, Vercel, Context API, State Management, Version Control, Cross-Browser Compatibility

PERSONAL PROJECTS

PDF Tool

- Developed a comprehensive PDF management platform supporting file conversion, OCR, merging, splitting, and compression.
- Integrated **Stripe** subscription payments to unlock premium features.

SmartResume

- Engineered a dynamic resume builder platform enabling users to create, customize, and download professional resumes.
- Embedded form-driven inputs for personal details, skills, education, and work experience with real-time preview functionality.

SportyDoctor(Admin Panel)

- Created the admin panel of fitness app ('Sporty Doctor') use to add 50+ workout and exercise modules and manage schedule.
- Designed responsive UI for 100+ users including progress tracking and exercise routines.

WebControl CMS

- Planned and developed a dynamic company website with an integrated admin panel for centralized content and data management using mongoDB, express, Nodejs for backend and React and Tailwind CSS for Frontend.

Furniture Studio

- Built a MERN stack Furniture Studio e-commerce platform with dedicated user and admin panels, implementing 8+ core features.

RozgarHub, Final Year Project

- Architected a location-based marketplace connecting customers with nearby blue-collar professionals for real-time service hiring.
- Added secure **role-based authentication** using JWT for customers and service providers.
- Constructed a gig marketplace enabling providers to create, update, and manage professional service listings.
- Implemented geolocation-based worker discovery using **Leaflet Maps**, improving service accessibility.
- Engineered an **Urgent Hire** system with **Socket.io** for instant real-time notifications.
- Built a real-time messaging platform using **WebSockets**, enabling seamless communication between customers and providers.

CodeClarify

- Developed a full-stack AI code explanation tool using React, Flask, and Google Gemini 2.5 Flash
- Achieved 95% language detection accuracy across 5 programming languages (Python, JavaScript, JSX/React, Java, C/C++) using the Pygments library

VOLUNTEER EXPERIENCE

SoftDesk, Senior Executive

09/2024 – 05/2025

- Organized and participated in alumni engagement events, including Tech Spectrum 2.0, coordinating logistics and communications.
- Engaged alumni and participants to foster professional connections and ensure smooth event execution.
